Regional Safety Challenges

- Traffic demand is exceeding capacity for some ANSPs
- Need updated infrastructure, technologies and procedures to cope with increasing traffic volume and complexity
- Recognising diverse safety cultures and differences in safety management maturity levels in the region

Our people play a critical role in sustainable growth
Regional Solutions for Regional Challenges

- Safety and efficiency of flights transcend national borders
- Growing airspace user expectations for more harmonised ATM services
- Regional solutions are required to evolving our mindset and approach to safety management in line with the global vision
- Collaboration and shared learning is the key
CANSO Global Safety Strategy
People Create Safety
APAC Safety WG – Ongoing Commitment

- Promoting the awareness and support of the Regional Safety Implementation Strategy across all APAC ANSPs
  - Annual review to adapt to changes

- Coordinating collaborative regional safety improvement actions

- Measuring and continual improvement
  - Progress of regional actions
  - ANSPs’ Safety Management System Maturity Levels
  - Our safety performance
I would like to congratulate the winner of this year’s Global Safety Achievement Award, Bui Thang of the Vietnam Air Traffic Management Corporation (VATM). Mr. Thang has developed SMS training programmes and in the past year has conducted 30 training classes for more than 1500 staff at all levels across the ANSP. His significant contributions have enhanced the perceptions and understanding of safety, safety culture and SMS in VATM and across the aviation industry in Vietnam.
